

## Subject Description Form

<b>Subject Code</b>	COMP201
<b>Subject Title</b>	Principles of Programming
<b>Credit Value</b>	3
<b>Level</b>	2
<b>Pre-requisite / Co-requisite/ Exclusion</b>	Pre-requisite/Co-requisite: Nil Exclusion: ENG236
<b>Objectives</b>	<ul style="list-style-type: none"> <li>• To provide students with knowledge on the fundamental elements in computer programming.</li> <li>• To introduce advanced computer programming techniques necessary for developing more sophisticated computer application programs.</li> </ul>
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <p><i>Professional/academic knowledge and skills</i></p> <p>(a) understand the programming elements for solving computing related problems;</p> <p>(b) possess the ability to design and develop efficient computer programs for solving problems;</p> <p>(c) possess the ability to learn advanced programming techniques independently;</p> <p>(d) possess the ability to learn other high level programming languages independently;</p> <p><i>Attributes for all-roundedness</i></p> <p>(e) develop skills in problem solving using systematic approaches;</p> <p>(f) identify and develop problem solutions in a logical manner;</p> <p>(g) learn independently new technologies;</p> <p>(h) solve complex problems in groups and develop group work.</p> <p><b>Alignment of Programme Outcomes:</b></p> <p>Programme Outcome 4: This subject contributes to developing critical thinking skills through lectures, in which students learn how to tackle simple problems; assignments and exercises in which they will practice their skills, and quizzes and examination questions in which their skills will be assessed.</p>

	<p>Programme Outcome 5: This subject contributes to problem solving with programming skills through lectures which will teach the students the necessary technical skills involved, assignments and projects in which students will practice these skills, and quizzes and examination questions in which these skills will be assessed.</p> <p>Programme Outcome 7: This subject contributes to team work with group-based projects for students to practice team spirit.</p>																																																																		
<p><b>Subject Synopsis/ Indicative Syllabus</b></p>	<p><b>1. Fundamentals of Computing</b> Basic concepts of computers and computing, compilation and interpretation, elementary programming constructs.</p> <p><b>2. Flow controls</b> Basic flow control: selection, repetition and functions.</p> <p><b>3. Data Collections</b> Structures, lists, sets and strings.</p> <p><b>4. Program Design</b> Problem solving, problem correctness, testing and debugging.</p> <p><b>5. Introduction to Programming Paradigms and Applications</b> Object-based Programming, Functional Programming, Logical Programming.</p>																																																																		
<p><b>Teaching/Learning Methodology</b></p>	<p>This subject emphasizes both the conceptual elements in computer programming and practical experiences. The lectures will be taught in a workshop mode with hands-on exercises reinforcing taught concepts. Students are required to attend the laboratory sessions, which allows them to consolidate their concepts learnt in the lectures. Other practical work helps to reinforce the programming skills learned for applications.</p>																																																																		
<p><b>Assessment Methods in Alignment with Intended Learning Outcomes</b></p>	<table border="1"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="8">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> <th>e</th> <th>f</th> <th>g</th> <th>h</th> </tr> </thead> <tbody> <tr> <td>1. 	<p><b>Note: Students must pass both the continuous assessment and examination sections to pass the course.</b></p> <p>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <p>The continuous assessment and the final examination will be designed to assess the specified learning outcomes. The formats may include written questions, programming exercises and quizzes.</p>	
<p><b>Student Study Effort Expected</b></p>	<p>Class contact:</p>	
	<ul style="list-style-type: none"> <li>▪ Lecture</li> </ul>	<p>26 Hrs.</p>
	<ul style="list-style-type: none"> <li>▪ Lab</li> </ul>	<p>13 Hrs.</p>
	<p>Other student study effort:</p>	
	<ul style="list-style-type: none"> <li>▪ Assignments, quizzes, projects, exams</li> </ul>	<p>81 Hrs.</p>
	<ul style="list-style-type: none"> <li>▪</li> </ul>	<p>Hrs.</p>
	<p>Total student study effort</p>	<p>120 Hrs.</p>
