

GLOBAL SEARCH for Academic Talents

The Department of Computing (COMP) of The Hong Kong Polytechnic University (PolyU) is seeking applications from outstanding candidates with expertise and experience in the areas relevant to the strategic focuses of COMP for the following positions globally, priority will be given to candidates with expertise in Big Data Analytics, Human-Centered Computing and Security.

Professor

The Professor will provide leadership in all aspects of academic activities, including research, teaching and service in the Department; conduct innovative and impactful research that leads to publications in top-tier refereed journals and knowledge transfer; engage in promoting research collaborations, securing external research grants, improving research output and increasing the level of consultancies; facilitate the Department in increasing its international visibility and strengthening its international connections; teach and contribute to curriculum development at undergraduate and postgraduate levels, and supervise research students; and contribute to departmental administration and management.

Candidates for this post should possess:

- + a PhD in relevant disciplines, plus substantial years of experience in teaching and research
- + a substantial record and reputation as an accomplished teacher, plus significant contributions to curriculum development/review or teaching and learning processes
- + a distinguished international reputation and a well-established track record of research, including refereed publications, external grants and postgraduate supervision
- + strong commitment to develop the relevant disciplines to the highest standards of excellence
- + demonstrated capability of academic management and leadership
- + a good network with international researchers to contribute to the development of high-level research collaborations between the Department and reputable organizations

Associate Professor/ Assistant Professor

The Associate Professor and Assistant Professor will teach at both undergraduate and postgraduate levels, and supervise research students; initiate and conduct innovative research leading to publications in top-tier refereed journals and award of external research grants; engage in research collaborations both internally and internationally; participate in professional services to the academic community and support activities that promote and foster links with the profession in the industry and community; and contribute to departmental activities.

Candidates for this post should possess:

- + a PhD degree with an excellent track record of research in one of the areas relevant to the strategic focuses of the Department
- + strong evidence of commitment to research that leads to top quality publications with high impact

For Associate Professorship, active participation in professional community activities, strong collaboration with international researchers, documented scholarly production and professional achievement in teaching and research are required.
