

Subject Description Form

Subject Code	COMP1002				
Subject Title	Computational Thinking and Problem Solving				
Credit Value	4				
Level	1				
Pre-requisite / Co-requisite / Exclusion	Nil				
Objectives	<p>The objective of this subject is to:</p> <ul style="list-style-type: none"> • equip students with no prior experience on computer programming with fundamental computational and skills. In particular, the students will learn how to abstract and solve problems, and how to implement them in a high-level programming language. 				
Intended Learning Outcomes	<p>Upon completion of the subject, students will be able to:</p> <p><i>Professional/academic knowledge and skills:</i></p> <ol style="list-style-type: none"> (a) understand the basic concepts of computational thinking, including sequential logic, abstractions, conceptualization and problem-solving; (b) model real-life problems as computational problems; (c) develop computer solutions to problems of low-to-moderate complexity and implement them using a high-level programming language, e.g. Python; and (d) acquire the basic programming skills to implement solutions using suitable data types and constructs. 				
Subject Synopsis/ Indicative Syllabus	<table border="1" style="width: 100%;"> <tr> <td style="text-align: center;">Topic</td> </tr> <tr> <td> <p>1. Introduction to Computational Thinking</p> <p>Formulating problems for computers to solve them; logically organizing and analyzing data; representing data through abstractions; automating solutions through algorithmic thinking; implementing efficient solutions; generalizing the problem-solving process.</p> </td> </tr> <tr> <td> <p>2. Problem Solving through a High-level Programming Language</p> <p>Computing with numbers and strings; lists and files; functions; decision structures; loop structures and Booleans; sets and dictionaries.</p> </td> </tr> <tr> <td> <p>3. Program Design</p> <p>Problem analysis and design; function abstraction and modularization; bottom up and top down approaches</p> </td> </tr> </table>	Topic	<p>1. Introduction to Computational Thinking</p> <p>Formulating problems for computers to solve them; logically organizing and analyzing data; representing data through abstractions; automating solutions through algorithmic thinking; implementing efficient solutions; generalizing the problem-solving process.</p>	<p>2. Problem Solving through a High-level Programming Language</p> <p>Computing with numbers and strings; lists and files; functions; decision structures; loop structures and Booleans; sets and dictionaries.</p>	<p>3. Program Design</p> <p>Problem analysis and design; function abstraction and modularization; bottom up and top down approaches</p>
Topic					
<p>1. Introduction to Computational Thinking</p> <p>Formulating problems for computers to solve them; logically organizing and analyzing data; representing data through abstractions; automating solutions through algorithmic thinking; implementing efficient solutions; generalizing the problem-solving process.</p>					
<p>2. Problem Solving through a High-level Programming Language</p> <p>Computing with numbers and strings; lists and files; functions; decision structures; loop structures and Booleans; sets and dictionaries.</p>					
<p>3. Program Design</p> <p>Problem analysis and design; function abstraction and modularization; bottom up and top down approaches</p>					

	<p>4. Application of Computational Techniques</p> <p>Applications in different domains, for example, financial data computing, puzzle solving, development of games, web development, and scientific computation.</p>																																					
<p>Teaching/ Learning Methodology</p>	<p>The 39-hour lecture will cover the main concepts and ideas in solving problems with computers and illustrate them using many examples. The students will also be given time to practice those concepts and ideas right away. The laboratory will be used to mainly cover program design.</p>																																					
<p>Assessment Methods in Alignment with Intended Learning Outcomes</p>	<table border="1" data-bbox="384 539 1469 1070"> <thead> <tr> <th data-bbox="384 539 772 752" rowspan="2">Specific assessment methods/tasks</th> <th data-bbox="772 539 938 752" rowspan="2">% weighting</th> <th colspan="5" data-bbox="938 539 1469 685">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th data-bbox="938 685 1043 752">a</th> <th data-bbox="1043 685 1149 752">b</th> <th data-bbox="1149 685 1254 752">c</th> <th data-bbox="1254 685 1359 752">d</th> <th data-bbox="1359 685 1469 752"></th> </tr> </thead> <tbody> <tr> <td data-bbox="384 752 772 931"> <p>Continuous Assessment (such as assignments, quizzes and mini-projects)</p> </td> <td data-bbox="772 752 938 931" style="text-align: center;">55%</td> <td data-bbox="938 752 1043 931" style="text-align: center;">✓</td> <td data-bbox="1043 752 1149 931" style="text-align: center;">✓</td> <td data-bbox="1149 752 1254 931" style="text-align: center;">✓</td> <td data-bbox="1254 752 1359 931" style="text-align: center;">✓</td> <td data-bbox="1359 752 1469 931"></td> </tr> <tr> <td data-bbox="384 931 772 999"> <p>Examination</p> </td> <td data-bbox="772 931 938 999" style="text-align: center;">45%</td> <td data-bbox="938 931 1043 999" style="text-align: center;">✓</td> <td data-bbox="1043 931 1149 999" style="text-align: center;">✓</td> <td data-bbox="1149 931 1254 999" style="text-align: center;">✓</td> <td data-bbox="1254 931 1359 999" style="text-align: center;">✓</td> <td data-bbox="1359 931 1469 999"></td> </tr> <tr> <td data-bbox="384 999 772 1070"> <p>Total</p> </td> <td data-bbox="772 999 938 1070" style="text-align: center;">100%</td> <td colspan="5" data-bbox="938 999 1469 1070"></td> </tr> </tbody> </table> <p data-bbox="384 1093 1469 1160">Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <p data-bbox="384 1193 1469 1261">Assignments and quizzes are designed to help achieve learning outcome (a) and (d), whereas the two mini-projects are designed for achieving (b) and (c).</p> <p data-bbox="384 1294 1469 1339">The examination will cover both (a), (c) and (d).</p>					Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					a	b	c	d		<p>Continuous Assessment (such as assignments, quizzes and mini-projects)</p>	55%	✓	✓	✓	✓		<p>Examination</p>	45%	✓	✓	✓	✓		<p>Total</p>	100%
