

Subject Description Form

Subject Code	COMP202						
Subject Title	Discrete Structures						
Credit Value	3						
Level	2						
Pre-requisite / Co-requisite/ Exclusion	Pre-requisite/Co-requisite: Nil Exclusion: COMP207, COMP210						
Objectives	<ul style="list-style-type: none"> • To introduce students to the concepts and applications of discrete mathematical structures. • To help students attain the fundamental mathematical knowledge and reasoning skills they need to be successful in upper-level computing subjects. 						
Intended Learning Outcomes	<p>Upon completion of the subject, students will be able to:</p> <p><i>Professional/academic knowledge and skills</i></p> <p>(a) apply discrete structures knowledge and skills to solve real world problems using computers;</p> <p>(b) understand the major mathematical knowledge in computer systems;</p> <p>(c) apply the computer programming techniques to solve practical engineering problems;</p> <p><i>Attributes for all-roundedness</i></p> <p>(d) acquire mathematical knowledge and skills required to further study other more advanced computing-related subjects;</p> <p>(e) relate learned mathematical knowledge to other computing subjects.</p>						
Subject Synopsis/ Indicative Syllabus	<table border="1" style="width: 100%;"> <thead> <tr> <th style="text-align: center;">Topic</th> </tr> </thead> <tbody> <tr> <td>1. Set, relations and functions Sets, relations and functions, equivalence, cardinality, order relations.</td> </tr> <tr> <td>2. Propositional and predicate logic Logical expressions; truth tables; Karnaugh maps; tautologies; deduction; predicates; quantifiers.</td> </tr> <tr> <td>3. Graphs and trees Representing graphs and graph isomorphism; connectivity; Euler and Hamilton Paths; shortest path problems; planar graphs; graph coloring; trees and tree traversal; spanning trees and minimum spanning trees.</td> </tr> <tr> <td>4. Modeling computation Automata; grammars and languages.</td> </tr> </tbody> </table>	Topic	1. Set, relations and functions Sets, relations and functions, equivalence, cardinality, order relations.	2. Propositional and predicate logic Logical expressions; truth tables; Karnaugh maps; tautologies; deduction; predicates; quantifiers.	3. Graphs and trees Representing graphs and graph isomorphism; connectivity; Euler and Hamilton Paths; shortest path problems; planar graphs; graph coloring; trees and tree traversal; spanning trees and minimum spanning trees.	4. Modeling computation Automata; grammars and languages.	
Topic							
1. Set, relations and functions Sets, relations and functions, equivalence, cardinality, order relations.							
2. Propositional and predicate logic Logical expressions; truth tables; Karnaugh maps; tautologies; deduction; predicates; quantifiers.							
3. Graphs and trees Representing graphs and graph isomorphism; connectivity; Euler and Hamilton Paths; shortest path problems; planar graphs; graph coloring; trees and tree traversal; spanning trees and minimum spanning trees.							
4. Modeling computation Automata; grammars and languages.							

Teaching/Learning Methodology	<ul style="list-style-type: none"> • Lectures are designed to clearly explain mathematical topics included in the subject. • Tutorials are set in the class to assist students to solve related questions. • Appropriate assignments and quiz are given to encourage student learning of mathematical knowledge. 																																																							
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1" data-bbox="483 394 1416 972"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> <th>e</th> </tr> </thead> <tbody> <tr> <td>1. Assignments</td> <td rowspan="4">60%</td> <td>✓</td> <td></td> <td>✓</td> <td>✓</td> <td></td> </tr> <tr> <td>2. Tutorial exercises</td> <td></td> <td>✓</td> <td>✓</td> <td></td> <td>✓</td> </tr> <tr> <td>3. Quiz</td> <td>✓</td> <td>✓</td> <td>✓</td> <td>✓</td> <td>✓</td> </tr> <tr> <td>4. Mid-term</td> <td>✓</td> <td>✓</td> <td>✓</td> <td>✓</td> <td></td> </tr> <tr> <td>5. Examination</td> <td>40%</td> <td>✓</td> <td>✓</td> <td>✓</td> <td>✓</td> <td></td> </tr> <tr> <td>Total</td> <td>100 %</td> <td colspan="5"></td> </tr> </tbody> </table> <p data-bbox="483 989 1440 1052">Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <p data-bbox="483 1115 1440 1245">Assignments and quiz can assist students in the learning of mathematics knowledge and extending their study to computing-related subjects. Quiz, mid-term and examination can force students to independently acquire required mathematical knowledge to attain the learning outcomes.</p>					Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					a	b	c	d	e	1.
